E: ericami54321@gmail.com | **P:** 814.308.3937 | **L:** ericami

EDUCATION

University of Chicago | *GPA: 3.7/4.0* **Chicago, IL**
Ph.D. Computer Science, Human-Computer Interaction (Advisor: Mina Lee) *Sep 2025 - Present*
Coursework: Human-Robot Interaction, UX Design, Machine Learning, Operating Systems, Linear Algebra, Probability

Pennsylvania State University | Schreyer Honors College | *GPA: 3.9/4.0* **University Park, PA**
M.S. Informatics (Advisor: Fred Fonseca) *Jun 2019 - Dec 2022*
B.S. Information Sciences and Technology | *Student Marshal*
B.A. Telecommunications

WORK EXPERIENCE

University of Chicago **Chicago, IL**
Graduate Research Assistant | Advisor: Mina Lee *Sep 2025 - Present*

- Designed a mixed-methods study to measure crowdworkers' AI competency through behavioral interaction logs
- Conducted correlation analysis, hierarchical regression, and simulation-based power analysis on pilot data (N = 30)
- Developed a scoring rubric to quantify AI competency across 6 critical evaluation constructs of AI chatbot use

EY-Parthenon **New York, NY**
Senior Associate | Summer Consulting Intern *Jun 2022 - Sep 2025*

- Supported 4 Fortune 500 companies on $2B-$60B deals across application migration, IT PMO, IAM, and costing
- Advised mega-fund PE firms on 20+ IT due diligences, including integration, separation, GenAI, and value creation

MIT Lincoln Laboratory **Lexington, MA**
Cybersecurity Operations Research Intern (Group 57, Information Services Department) *Mar 2023 - Sep 2023*

- Built 2 SAP dashboards for leadership cybersecurity risk reports and automated vulnerability tracking with Jira API
- Evaluated neural network architectures to assess suitability for cybersecurity anomaly detection

IBM **Durham, NC**
Project Manager Intern (Red Hat Marketplace) *May 2021 - Aug 2021*

- Led Agile retrospectives with feature squads through design-thinking workshops, driving 4 project proposals
- Proposed data hygiene cleanse to reduce file duplication by 20% and implemented a systematic data hierarchy system

Johnson & Johnson **Raritan, NJ**
Data Analytics Intern *Jun 2020 - Aug 2020*

- Predicted device downtime with DataRobot time-series modeling, saving 3 hours of manual monitoring daily
- Queried ticket data in Cloudera Impala with SQL to identify process improvement opportunities from ticket metrics

---

RESEARCH

2024 NSF Computer and Information Science and Engineering (CISE) Graduate (CSGrad4US) Fellowship

SKILLS AND VOLUNTEERISM

Research Methods: A/B Testing, Usability Studies, Survey Design, Interviews, Hypothesis Testing, Thematic Analysis
Languages: Python, R, SQL, Java, C, JavaScript
Technologies: Jupyter, Git, NumPy, Qualtrics, Figma, SPSS, NVivo, Tableau, Power BI, Microsoft Excel
Community: Graduate Women in CS (President), People & Technology Seminars, South Side Science Festival
